**Subject:** Re: Feedback for the Future Development Application for White Rose Park - September 23rd Virtual Meeting

Good Afternoon Ms. Stephanie Lacey-Avon and Mr. Clinton Stredwick,

I write today to provide feedback in regard to the proposal involving the 86 - 88 unit plan for White Rose Park. In my dealings with this company over the past 5 years, I could express my grievances, frustrations and despair but instead I come to you with my humble opinion. The fact is, I am happy that there is new growth in Dundalk. It will provide many young professionals and seasoned craftsman the opportunity for work and it will also create homes for new families. During this time, I think we can all agree on the importance of this matter. My **strong** suggestion for the owners and supervisors of White Rose Park is to simply complete Todd Crescent before moving onto another endeavour. I **implore** the town of Southgate to see that our subdivision be taken care of **first** before they are able to break ground elsewhere. We have waited and we have been patient. We have witnessed countless wasted days, months and years roll off the calendar with no end in sight. It is the responsibility of this builder to finally get organized and get the job done once and for all. As much as the builder wants to be out of this subdivision and into fresh projects, we want them out of our lives. I believe all residents of Todd Crescent would agree that all we want is what is owed to us and what is in our contract, nothing more. I wish White Rose Park all the best in their future dealings and all future residents to have a better and more positive experience than most of us in Todd Crescent.

Thank you for your time.

Silvia Watt
